

# Broad scale LCLUC in Eastern Europe – Patterns, drivers and effects

Foto: Adrian Petrisor

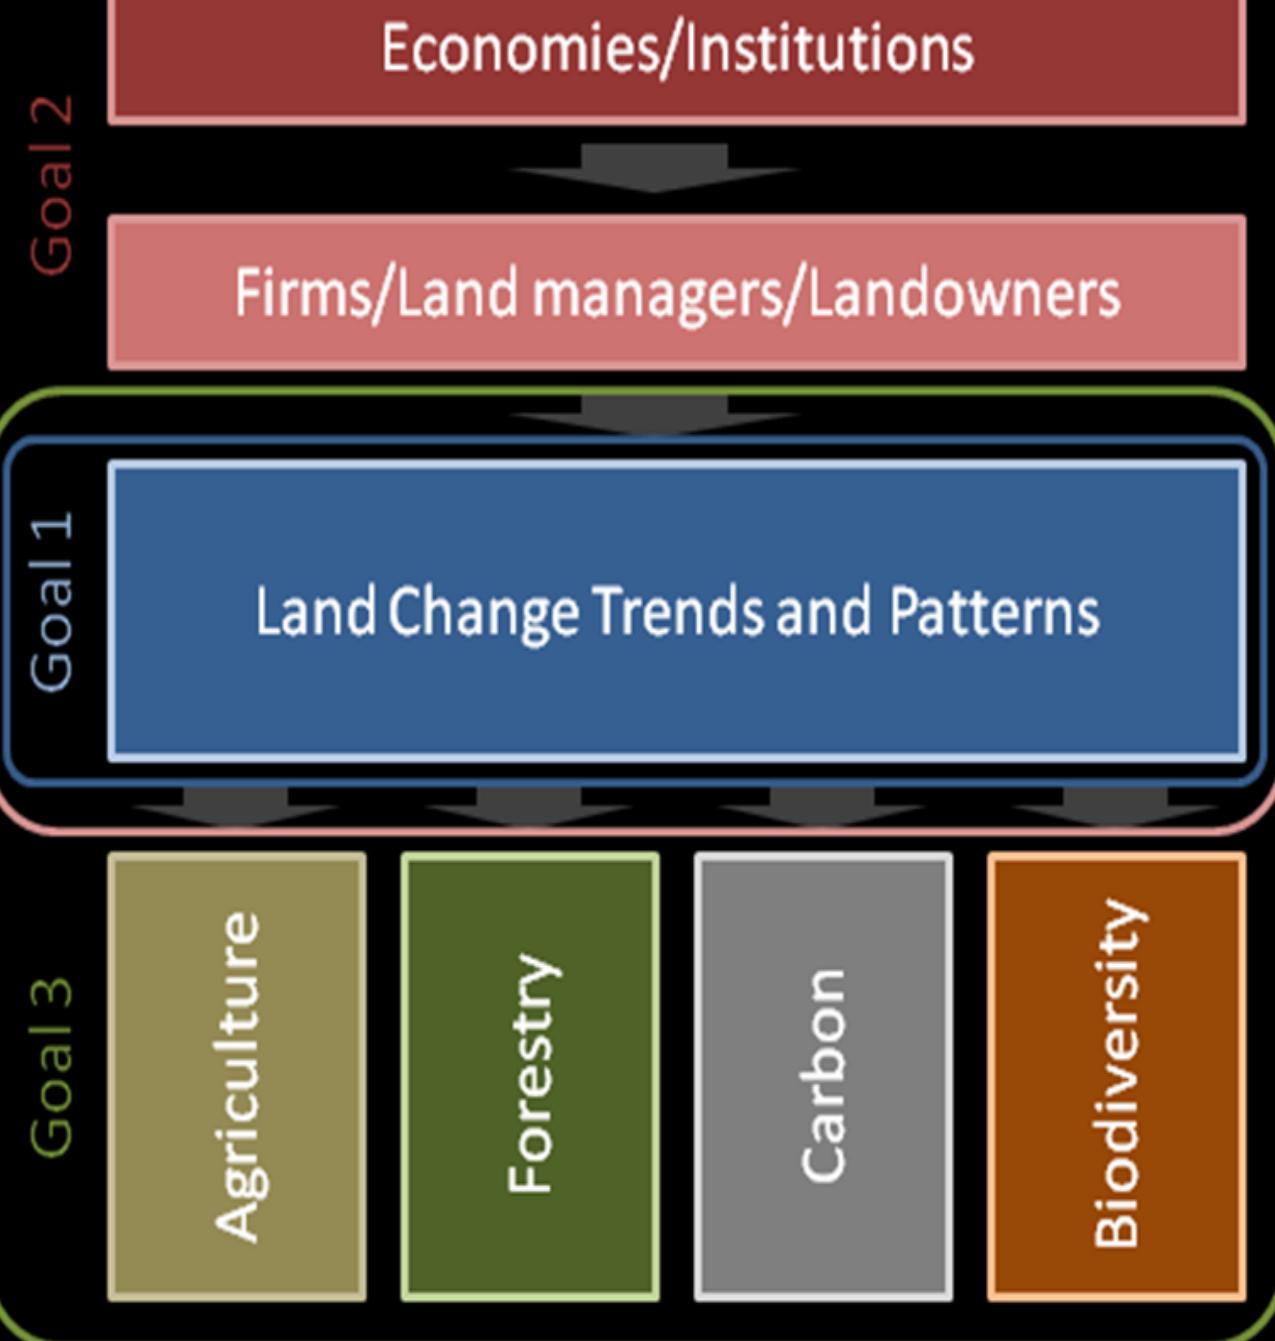

Catalina Munteanu, Volker C. Radeloff, Tobias Kuemmerle, Peter Potapov, Matthias Baumann, Patrick Griffiths, Camilo Alcantara, Eugenia Bragina, Patrick Culbert...

...and the consortia of:

- **200 years land use land cover change in the Carpathian Basin**
- **Synthesis of studies on institutional change and LCLUC effects on carbon, biodiversity, and agriculture after the collapse of the Soviet Union**

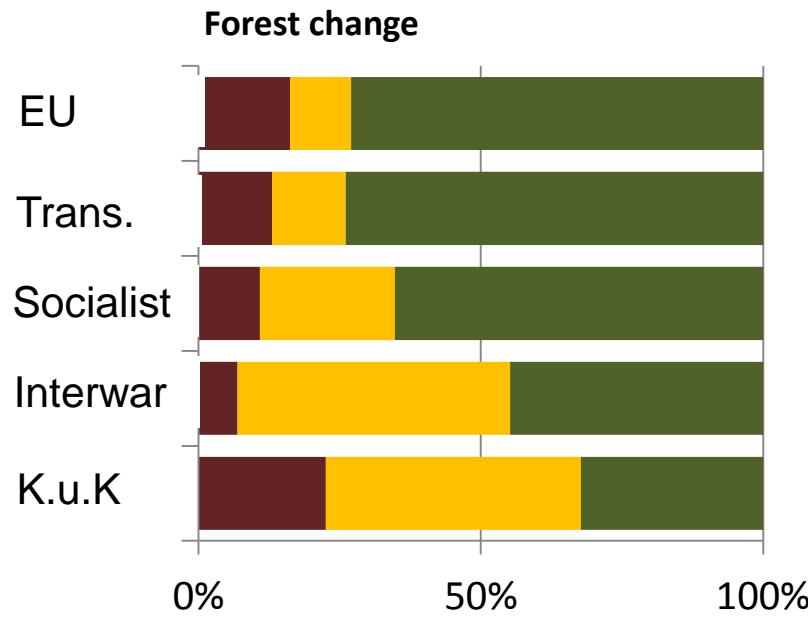

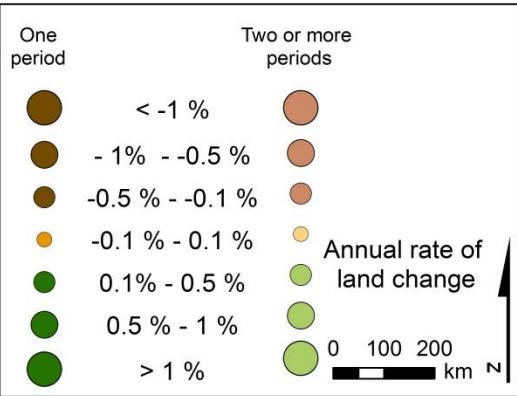

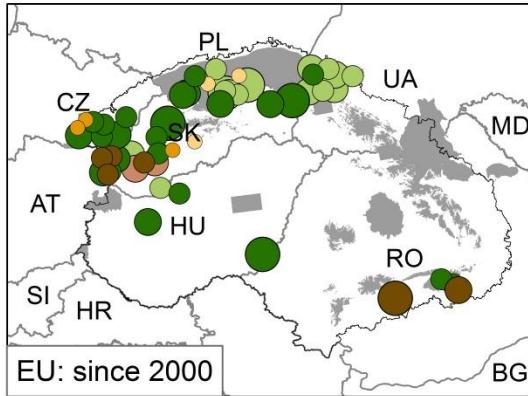

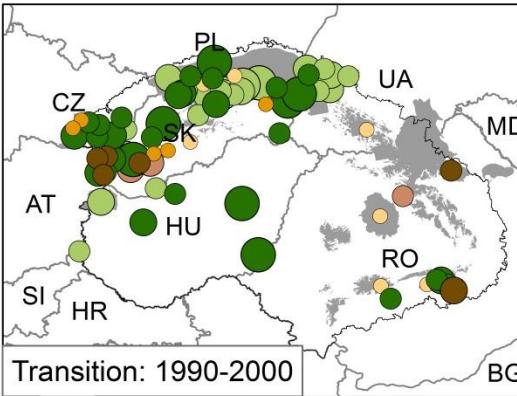

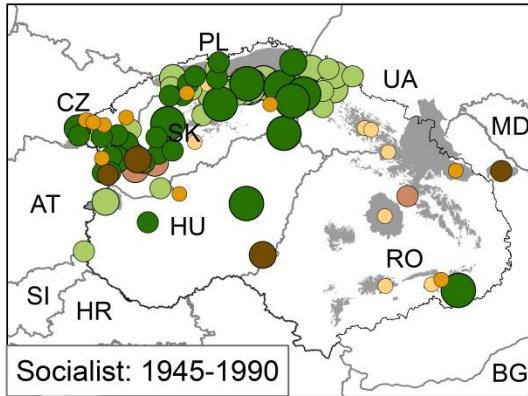

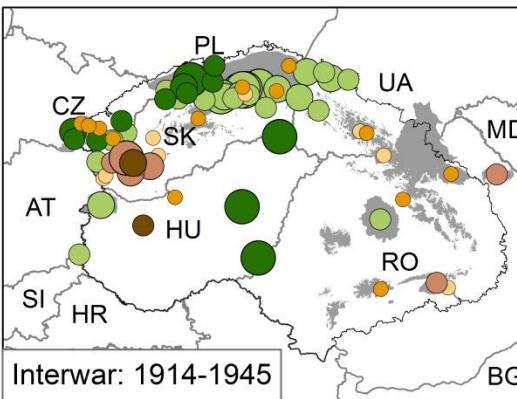

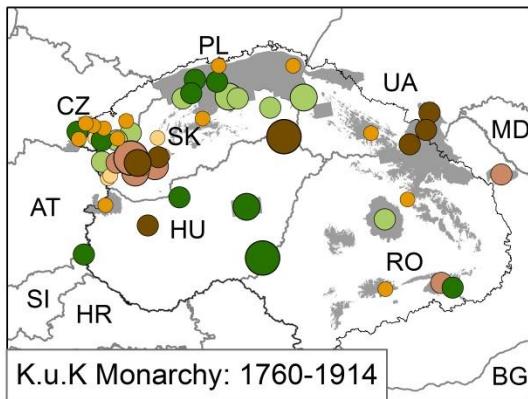

Understand the effects of  
socioeconomic shocks on land  
cover change, land use intensity  
and the implications for  
biodiversity

# Outline

- Forest cover change
- Agricultural abandonment
- Effects on large mammals

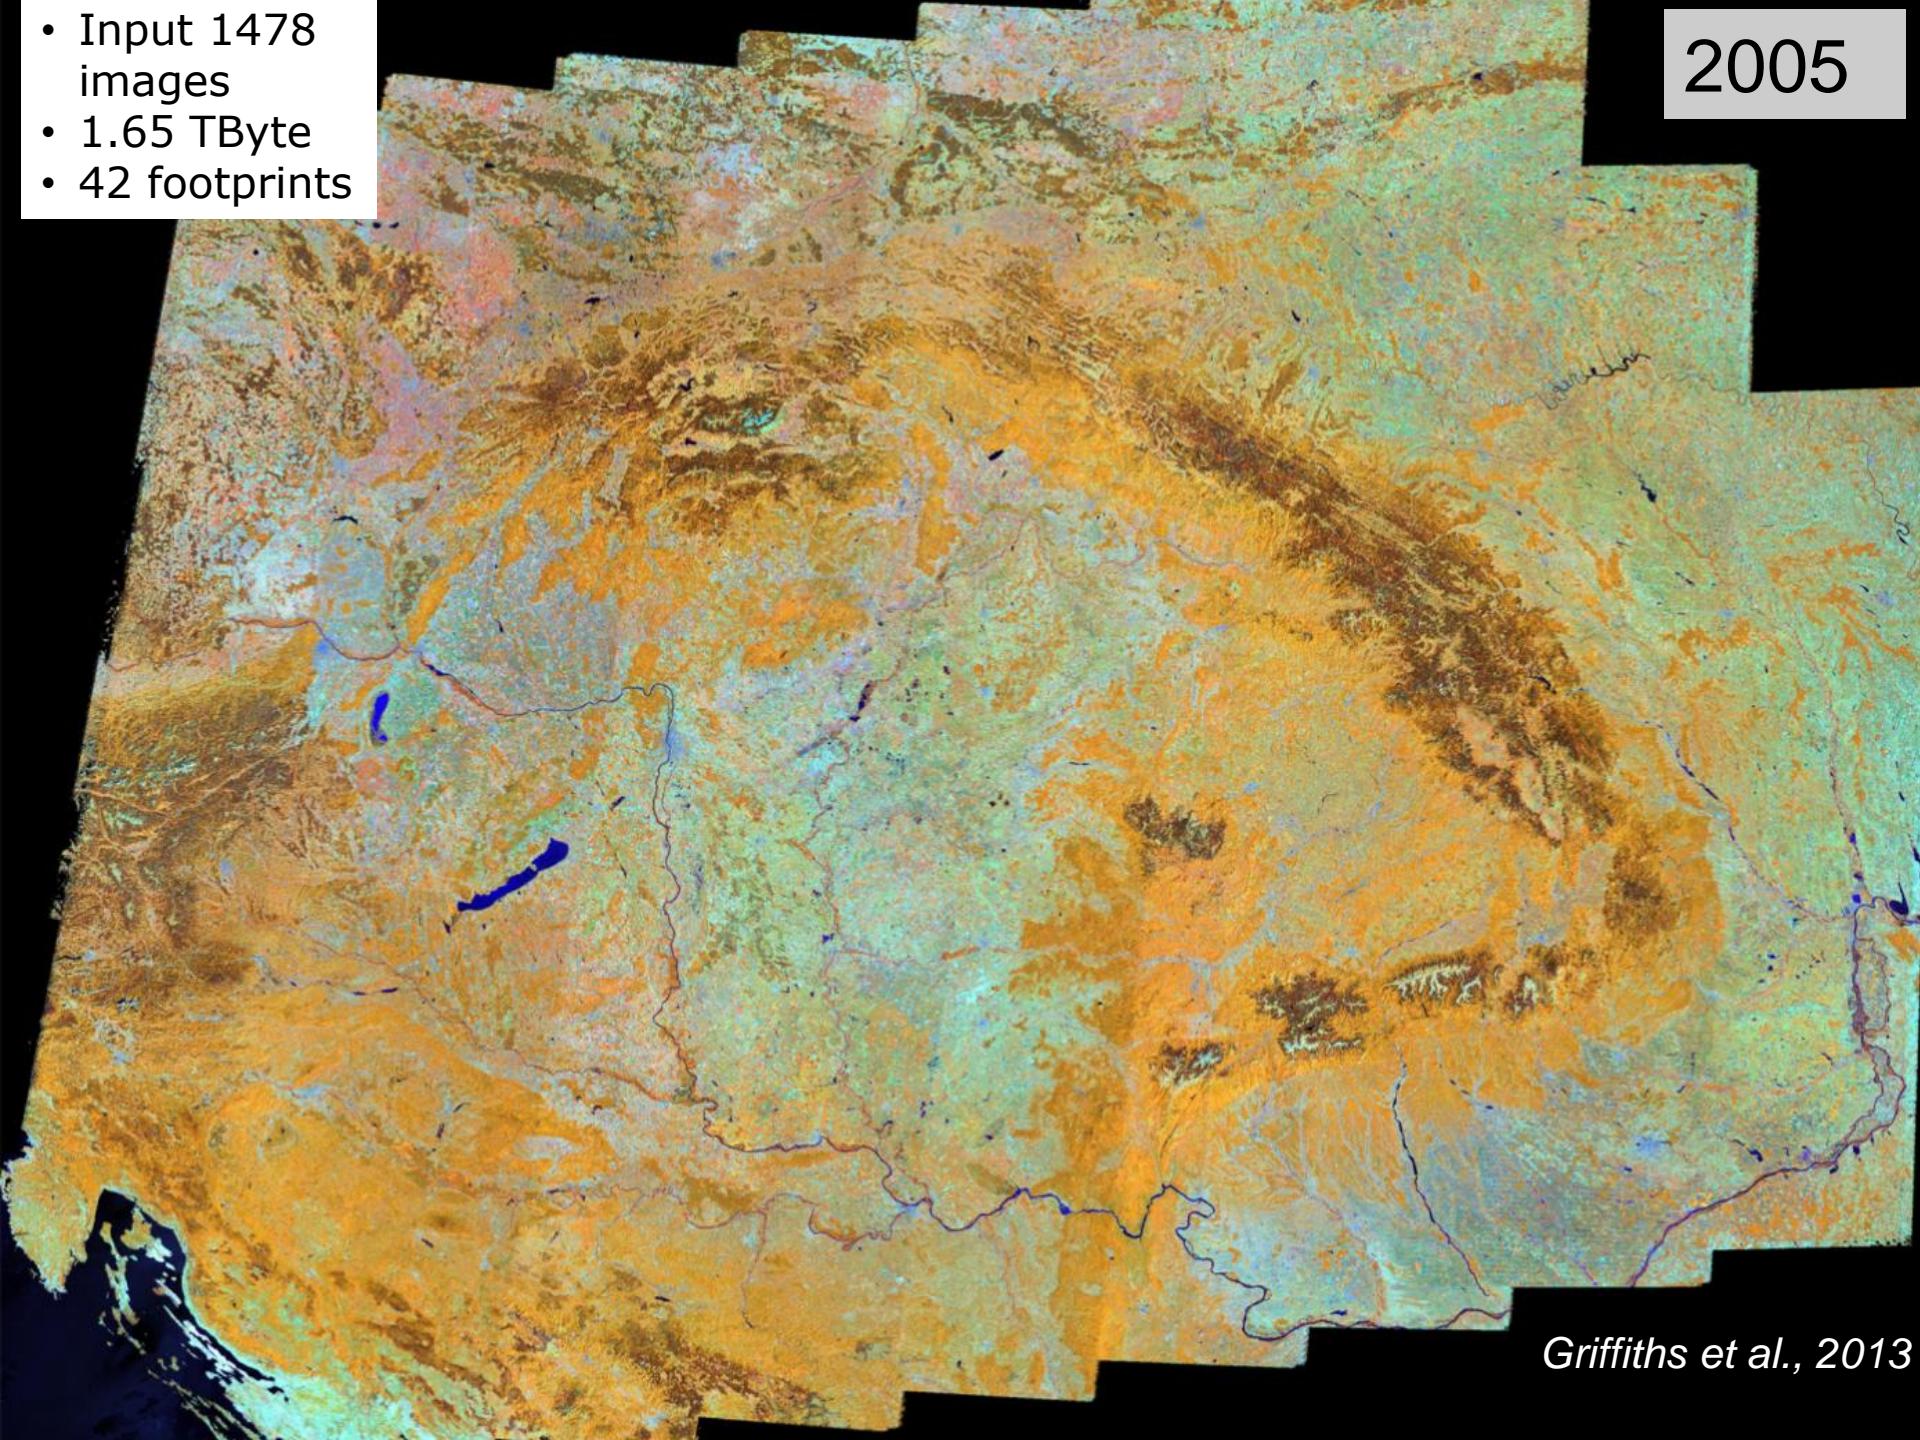

1760-2010

- Forest transition  
1914-1945
- Temporal variation

②0

- decline and recovery
- cascading effects
- species matter

# Conclusions: patterns

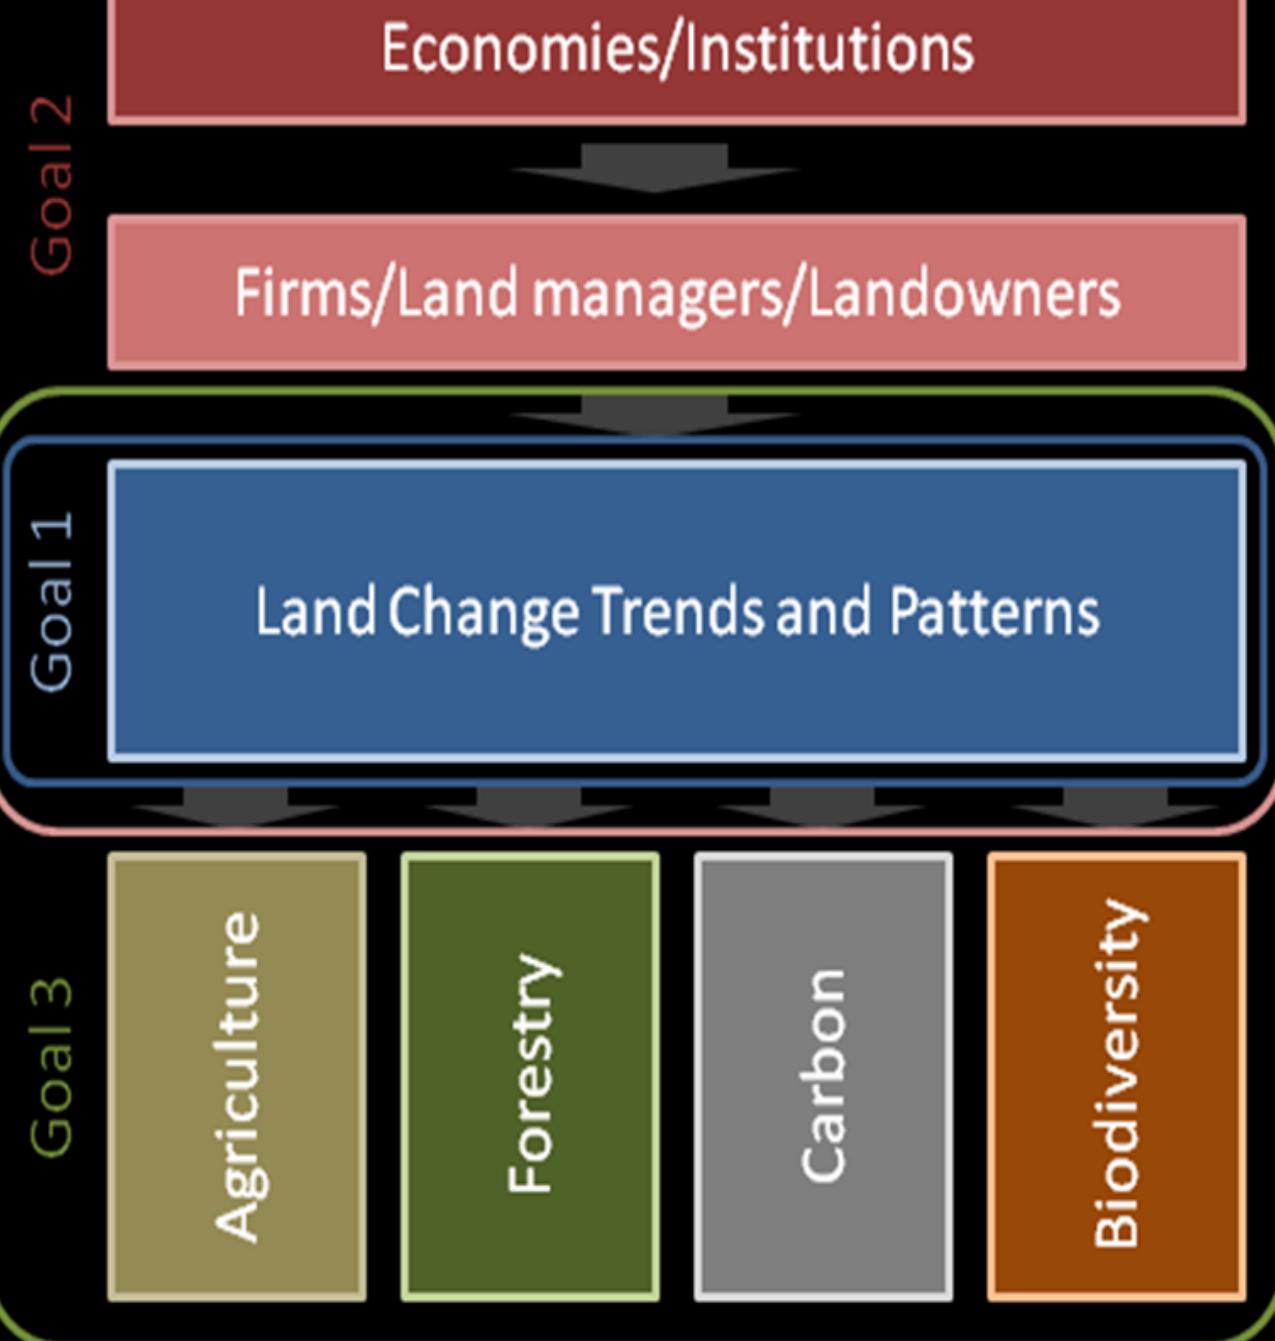

- Forest increase/ agricultural abandonment
- Countries and regions matter
- Drivers interplay
- Importance of shocks
- Importance of scales

# Conclusions: theories

- Land use legacies
- Time lags
- Multiple stable states

# Conclusions: networking

Thank you!
